The Hydrosphere and Biosphere — Practice Test

This practice test was made by AI and there may be mistakes. If a question or answer looks wrong, use the Flag a mistake button to let Brett know so he can fix it.

1 **Decomposers are important in an ecosystem because they break down dead material and return**

- A sunlight to the Sun
- B nutrients to the soil and water
- C salt to the ocean only
- D heat to the atmosphere only

Understand It with Pulse | Flag a mistake

2 **A keystone species is a species that has a large effect on its ecosystem relative to its**

A body size only

B colour only

C abundance

D age only

Understand It with Pulse | Flag a mistake

3 **An invasive species can harm a native ecosystem by outcompeting native species for food, space or other resources and by**

A increasing native diversity always

B cleaning polluted water always

C creating new soil always

D spreading without its usual predators or diseases

Understand It with Pulse | Flag a mistake

4 **Transpiration is the process by which plants release water vapour from their leaves into the**

A atmosphere

B deep mantle

C ocean floor

D inner core

Understand It with Pulse | Flag a mistake

5 **Riparian vegetation along a riverbank helps the river system by stabilising banks, shading water and**

A blocking all water flow

B filtering runoff before it reaches the stream

C warming water to boiling

D removing all fish

Understand It with Pulse | Flag a mistake

6 **Oceans help regulate global climate by absorbing and storing large amounts of heat and carbon dioxide, although absorbing extra carbon dioxide can also make seawater more**

- A salty in a helpful way
- B frozen
- C acidic
- D clear of life

Understand It with Pulse | Flag a mistake

7 **The graph shows river flow through one year. The month with the highest river flow shown is month**

- A 1
- B 7
- C 10
- D 4

Understand It with Pulse | Flag a mistake

8 **The schematic map of Canada highlights one region. The dominant natural biome of much of the highlighted region is**

A grassland

B tundra

C temperate rainforest

D coral reef

Understand It with Pulse | Flag a mistake

9 **Rainfall in three months was 40 millimetres, 60 millimetres and 80 millimetres. The mean monthly rainfall, in millimetres, is**

ANSWER _____

Understand It with Pulse | Flag a mistake

10 **Water that falls on land and then moves through soil to reach a stream is an example of water moving between the hydrosphere and the**

A inner core only

B biosphere and geosphere through the landscape

C thermosphere only

D exosphere only

Understand It with Pulse | Flag a mistake

ANSWER KEY

1.	B	**5.**	B	**9.**	60
2.	C	**6.**	C	**10.**	B
3.	D	**7.**	D		
4.	A	**8.**	A
