Division facts

Difficulty level: Easy

Mathematics: Kindergarten to Grade 3

This document was made by AI and there may be mistakes. If a question or answer looks wrong, use the Flag a mistake button to let Brett know so he can fix it.

Overview of the concept

These are the division facts you know by heart, like knowing 12 ÷ 3 is 4. When they are automatic, you can split things up without working it out each time, like sharing snacks or working out how many groups you can make. That speed frees up your brain for the harder part of a problem. It is the same reason times tables matter, since division facts are just multiplication facts turned around.

Worked examples

EXAMPLE 1

Q 42 ÷ 7 = ?

SOLUTION

Think of the matching multiplication fact: 7 × ? = 42

You know 7 × 6 = 42

So 42 ÷ 7 = 6

EXAMPLE 2

Q 56 ÷ 8 = ?

SOLUTION

Think of the matching multiplication fact: 8 × ? = 56

You know 8 × 7 = 56

So 56 ÷ 8 = 7

Practice questions

1 35 cookies are shared equally among 5 friends. How many cookies does each friend get?
