Number words

Difficulty level: Easy

Mathematics: Kindergarten to Grade 3

This document was made by AI and there may be mistakes. If a question or answer looks wrong, use the Flag a mistake button to let Brett know so he can fix it.

Overview of the concept

This is how you write numbers in words on a cheque, a birthday card, or a form, so the amount is clear and cannot be changed easily. A cheque written as one hundred dollars is much harder to alter than a cheque that just says 100, which is why banks still ask for the words. The same habit shows up on contracts and legal forms, where the amount in words is the one that counts if the figures disagree. Writing numbers in words is a small step that protects you from mistakes and from tampering.

Worked examples

EXAMPLE 1

Q Write 24 in words.

SOLUTION

Split the number into tens and ones. 24 is 2 tens and 4 ones, so it is twenty-four.

24 = twenty-four

EXAMPLE 2

Q Write thirty-five as a numeral.

SOLUTION

Thirty is 3 tens and five is 5 ones. Put the 3 first and the 5 second.

Thirty-five = 35
