1 **According to Source I, what is the central idea of the passage?**

Question 1

According to Source I, what is the central idea of the passage?

A) Teenagers prefer late nights for fun

B) A later teen sleep clock plus early school starts creates sleep debt, and later starts show benefits but require whole day planning

C) Bus schedules are the only school problem

D) Sports practice should be cancelled

- **A** Teenagers prefer late nights for fun
- **B** A later teen sleep clock plus early school starts creates sleep debt, and later starts show benefits but require whole day planning
- **C** Bus schedules are the only school problem
- **D** Sports practice should be cancelled

Understand It with Pulse | Flag a mistake

Many studies of teenagers find the same pattern: the brain's sleep clock shifts later in adolescence, so many teens do not feel sleepy until late at night, yet early school start times still require them to wake before dawn. The result is a regular sleep debt that builds across the school week.

Researchers who studied schools that moved start times later found that students reported less daytime sleepiness and, in several districts, tardiness fell. Supporters argue that a later start is a low cost change with clear benefits for attention and mood. Critics note that later starts can clash with bus schedules, after school jobs, and sports practice, so districts must plan the whole day, not just the first bell.

The evidence does not prove that a later start alone will fix every school problem. It does suggest, however, that sleep is one factor schools can influence, and that decisions about start times should weigh student health alongside transport and activities.

2 According to Source I, what evidence supports later start times?

Question 2

According to Source I, what evidence supports later start times?

A) students reported less daytime sleepiness and tardiness fell in several districts

B) every school problem disappeared

C) parents stopped driving students to school

D) teachers worked fewer hours

- **A** students reported less daytime sleepiness and tardiness fell in several districts
- **B** every school problem disappeared
- **C** parents stopped driving students to school
- **D** teachers worked fewer hours

6 According to Source II, what is the author's main argument?

Question 6

According to Source II, what is the author's main argument?

A) libraries provide valuable free services beyond books and are worth funding as a public good

B) libraries are outdated and should close

C) phones have replaced all library services

D) only students use libraries

- **A** libraries provide valuable free services beyond books and are worth funding as a public good
- **B** libraries are outdated and should close
- **C** phones have replaced all library services
- **D** only students use libraries

Understand It with Pulse | Flag a mistake

Some argue that public libraries are outdated because almost any fact can be found on a phone. That argument misses what libraries actually do. Libraries lend books, but they also provide quiet study space, help with job applications, classes for new readers, and free internet access for people who have none at home.

A town that closes its library does not just lose books. It loses a free, shared place where students can study after school, where job seekers can print resumes, and where older residents can learn new technology with patient help. Digital access helps, but it is not the same as a staffed public space open to everyone.

Keeping a library does cost money, and towns must make hard budget choices. The question is not whether libraries are free to run, but whether the services they provide are worth funding as a public good, like parks and roads.

7 **According to Source II, which is an example of a library service beyond lending books?**

Question 7

According to Source II, which is an example of a library service beyond lending books?

A) selling phones

B) running a sports team

C) help with job applications and free internet access

D) building roads

- **A** selling phones
- **B** running a sports team
- **C** help with job applications and free internet access
- **D** building roads

10 **According to Source III, what is the main idea of the passage?**

Question 10

According to Source III, what is the main idea of the passage?

A) all blogs are false

B) a strong researcher checks author, date, evidence, and agreement with other reliable sources, and names bias instead of accepting one source alone

C) peer reviewed studies are never useful

D) opinions are always facts

- **A** all blogs are false
- **B** a strong researcher checks author, date, evidence, and agreement with other reliable sources, and names bias instead of accepting one source alone
- **C** peer reviewed studies are never useful
- **D** opinions are always facts

Understand It with Pulse

Flag a mistake

Not every source that looks professional is reliable. A strong researcher checks who wrote a source, when it was published, what evidence it cites, and whether other reliable sources agree. A personal blog may be honest, but it is not the same as a peer reviewed study or a report from an agency that checks its facts.

Bias does not always mean a source is useless. A source with a clear point of view can still be useful if the reader names the bias, checks its claims against other sources, and separates facts from opinions. The danger comes when a reader accepts one source alone, without checking, and treats opinion as settled fact.

11 **According to Source III, what should a reader do with a biased source?**

Question 11

According to Source III, what should a reader do with a biased source?

A) ignore it completely

B) treat its opinions as settled fact

C) name the bias, check claims against other sources, and separate facts from opinions

D) copy it without citation

- **A** ignore it completely
- **B** treat its opinions as settled fact
- **C** name the bias, check claims against other sources, and separate facts from opinions
- **D** copy it without citation
