Taxonomy and Diversity of Organisms — Practice Test

This practice test was made by AI and there may be mistakes. If a question or answer looks wrong, use the Flag a mistake button to let Brett know so he can fix it.

1 **A protozoan is a protist that**

- **A** has no cell membrane
- **B** moves and eats other organisms or particles
- **C** photosynthesizes like a plant
- **D** forms a mushroom cap

Understand It with Pulse | Flag a mistake

2 **Yeasts belong to the kingdom**

A Animalia

B Protista

C Fungi

D Plantae

Understand It with Pulse | Flag a mistake

3 **Lichens are formed by a fungus living with an alga or a**

A moss

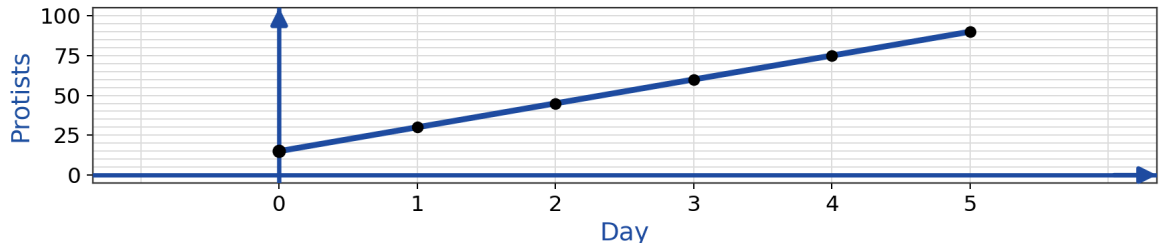

B fern

C flowering plant

D cyanobacterium

4 **The graph shows protists counted in pond samples over five days. On day 3, the count is**

- **A** 60
- **B** 75
- **C** 30
- **D** 45

Understand It with Pulse | Flag a mistake

5 **Mosses differ from flowering plants because mosses**

- **A** photosynthesize in roots
- **B** lack true roots and reproduce by spores
- **C** produce seeds in flowers
- **D** have woody trunks

Understand It with Pulse | Flag a mistake

6 **Sponges are animals even though they do not move as adults because they**

A have cell walls

B form spores

C are multicellular and eat food

D photosynthesize

Understand It with Pulse | Flag a mistake

7 **A scientific name is written with the genus name**

A lowercase and the species name capitalized

B both words capitalized

C both words lowercase

D capitalized and the species name lowercase

Understand It with Pulse | Flag a mistake

8 **Classification based on evolutionary relationships means that close relatives are placed**

A in the same or nearby groups

B in different domains always

C by size only

D by habitat only

Understand It with Pulse | Flag a mistake

9 **Bacteria that cause disease are called**

A pollinators

B pathogens

C decomposers

D producers

Understand It with Pulse | Flag a mistake

10 **Diversity within a kingdom is shown by the fact that protists**

A all live in soil

B never reproduce

C include both algae and protozoa

D all look identical
