NORTH DAKOTA PHYSICS · NORTH DAKOTA

North Dakota Physics

Practice Test

Unit 4: Light and Modern Physics

10 Questions

Original practice test based on the North Dakota curriculum. Work through each question, then check your answers at the end.

This practice test was made by AI and there may be mistakes. If a question or answer looks wrong, use the Flag a mistake button to let Brett know so he can fix it.

Question 1

Use $h = 6.63 \times 10^{-34}$ J s. A photon of frequency 1.0×10^{14} Hz has energy about

A) 6.63×10^{-20} J

B) 6.63×10^{-48} J

C) 6.63×10^{-34} J

D) 1.51×10^{20} J

Understand It with Pulse Flag a mistake

Question 2

An object 5 cm tall is magnified by 4. Its image height, in centimeters, is ____

Understand It with Pulse Flag a mistake

Question 3

Light of wavelength 450 nm in air enters glass of refractive index 1.5. Its wavelength in glass, in nanometers, is ____

Understand It with Pulse Flag a mistake

Question 4

A sample starts with 48 g of a radioactive isotope. After two half lives, the mass remaining, in grams, is

____

Understand It with Pulse Flag a mistake

Question 5

Total internal reflection can occur only when light travels from a medium of

A) lower to higher refractive index

B) higher to lower refractive index

C) equal refractive index

D) zero refractive index

Understand It with Pulse Flag a mistake

Question 6

The color of light with the longest wavelength in the visible spectrum is

A) violet

B) blue

C) green

D) red

Understand It with Pulse Flag a mistake

Question 7

The energy of a photon increases when its

A) wavelength increases

B) speed decreases

C) amplitude decreases

D) frequency increases

Understand It with Pulse Flag a mistake

Question 8

A ray hits a mirror at incidence angle 25 degrees. The reflection angle, in degrees, is ____

Understand It with Pulse Flag a mistake

Question 9

Nuclear power plants in common use get energy mainly from

A) fusion

B) photoelectric emission

C) refraction

D) fission

Question 10

An electron in an atom absorbs a photon and moves to a

A) lower energy level

B) nucleus

C) different element

D) higher energy level

Understand It with Pulse

ANSWER KEY

1. A
2. 20
3. 300
4. 12
5. B
6. D
7. D
8. 25
9. D
10. D
