Source I - Schools Should Start Later

Use this reading for question 7.

High schools should start later in the morning. Research on teen sleep shows that adolescents naturally fall asleep later at night and need about nine hours of sleep, yet most high school students rise before dawn to catch early buses. This sleep gap harms learning: tired students struggle to concentrate, remember lessons, and stay healthy.

Three clear benefits support a later start. First, students who sleep more perform better on tests and miss fewer school days. Second, later starts reduce morning car crashes involving teen drivers, because drowsy driving becomes less common. Third, teachers report calmer first period classes when students arrive rested rather than exhausted.

Some people argue that a later start would disrupt sports practices and after school jobs. That concern is real, but it can be managed. Schools that moved to later starts adjusted practice times and bus schedules, and most families adapted within one school year. The health and learning gains for students outweigh the scheduling inconvenience. Schools should act on the evidence and start later.

1 **According to Source I, what is the author's main claim?**

- **A** High schools should start earlier in the morning.
- **B** Students should give up after school jobs.
- **C** Teachers should cancel first period classes.
- **D** High schools should start later in the morning.
