Energy and Environment — Practice Test

Prince Edward Island Modern World Issues 12 • 25 questions

This practice test was made by AI and there may be mistakes. If a question or answer looks wrong, use the Flag a mistake button to let Brett know so he can fix it.

1 **In energy and environment issues, what does renewable energy mean?**

- A fuel formed from ancient plants and animals such as coal
- B energy from sources that refill naturally such as wind and sun
- C gases released by burning fuels that trap heat
- D long term shifts in global weather patterns

Understand It with Pulse | Flag a mistake

2 **In energy and environment issues, which term matches this description? energy from sources that refill naturally such as wind and sun**

A fossil fuel

B renewable energy

C carbon emissions

D climate change issues

Understand It with Pulse | Flag a mistake

3 **In energy and environment issues, which phrase is most closely linked to renewable energy?**

A ancient fuel

B heat trapping gases

C refilling energy

D weather pattern shifts

Understand It with Pulse | Flag a mistake

4 **In energy and environment issues, what does fossil fuel mean?**

A gases released by burning fuels that trap heat

B long term shifts in global weather patterns

C protecting natural resources from waste and damage

D fuel formed from ancient plants and animals such as coal

Understand It with Pulse | Flag a mistake

5 **In energy and environment issues, which term matches this description? fuel formed from ancient plants and animals such as coal**

A fossil fuel

B carbon emissions

C climate change issues

D conservation issues

Understand It with Pulse | Flag a mistake

6 **In energy and environment issues, which phrase is most closely linked to fossil fuel?**

A heat trapping gases

B ancient fuel

C weather pattern shifts

D resource protection

Understand It with Pulse | Flag a mistake

7 **In energy and environment issues, what does carbon emissions mean?**

A long term shifts in global weather patterns

B protecting natural resources from waste and damage

C gases released by burning fuels that trap heat

D harmful substances released into air water or soil

Understand It with Pulse | Flag a mistake

8 **In energy and environment issues, which term matches this description? gases released by burning fuels that trap heat**

- A climate change issues
- B conservation issues
- C pollution issues
- D carbon emissions

Understand It with Pulse | Flag a mistake

9 **In energy and environment issues, which phrase is most closely linked to carbon emissions?**

- A heat trapping gases
- B weather pattern shifts
- C resource protection
- D harmful releases

Understand It with Pulse | Flag a mistake

10 **In energy and environment issues, what does climate change issues mean?**

A protecting natural resources from waste and damage

B long term shifts in global weather patterns

C harmful substances released into air water or soil

D clearing large areas of forest

Understand It with Pulse | Flag a mistake

11 **In energy and environment issues, which term matches this description? long term shifts in global weather patterns**

A conservation issues

B pollution issues

C climate change issues

D deforestation issues

Understand It with Pulse | Flag a mistake

12 **In energy and environment issues, which phrase is most closely linked to climate change issues?**

A resource protection

B harmful releases

C forest clearing

D weather pattern shifts

Understand It with Pulse | Flag a mistake

13 **In energy and environment issues, what does conservation issues mean?**

A protecting natural resources from waste and damage

B harmful substances released into air water or soil

C clearing large areas of forest

D a resource used at a rate nature can replace

Understand It with Pulse | Flag a mistake

14 **In energy and environment issues, which term matches this description? protecting natural resources from waste and damage**

A pollution issues

B conservation issues

C deforestation issues

D sustainable resource

Understand It with Pulse | Flag a mistake

15 **In energy and environment issues, which phrase is most closely linked to conservation issues?**

A harmful releases

B forest clearing

C resource protection

D replaceable use

Understand It with Pulse | Flag a mistake

16 **In energy and environment issues, what does pollution issues mean?**

A clearing large areas of forest

B a resource used at a rate nature can replace

C reliable access to affordable energy supplies

D harmful substances released into air water or soil

Understand It with Pulse | Flag a mistake

17 **In energy and environment issues, which term matches this description? harmful substances released into air water or soil**

A pollution issues

B deforestation issues

C sustainable resource

D energy security

Understand It with Pulse | Flag a mistake

18 **In energy and environment issues, which phrase is most closely linked to pollution issues?**

A forest clearing

B harmful releases

C replaceable use

D reliable energy access

Understand It with Pulse | Flag a mistake

19 **In energy and environment issues, what does deforestation issues mean?**

A a resource used at a rate nature can replace

B reliable access to affordable energy supplies

C clearing large areas of forest

D reusing materials instead of throwing them away

Understand It with Pulse | Flag a mistake

20 **In energy and environment issues, which term matches this description? clearing large areas of forest**

A sustainable resource

B energy security

C recycling issues

D deforestation issues

Understand It with Pulse | Flag a mistake

21 **In energy and environment issues, which phrase is most closely linked to deforestation issues?**

A forest clearing

B replaceable use

C reliable energy access

D material reuse

Understand It with Pulse | Flag a mistake

22 **In energy and environment issues, what does sustainable resource mean?**

- A reliable access to affordable energy supplies
- B a resource used at a rate nature can replace
- C reusing materials instead of throwing them away
- D lack of enough clean water to meet needs

Understand It with Pulse | Flag a mistake

23 **In energy and environment issues, which term matches this description? a resource used at a rate nature can replace**

- A energy security
- B recycling issues
- C sustainable resource
- D water scarcity

Understand It with Pulse | Flag a mistake

24 **In energy and environment issues, which phrase is most closely linked to sustainable resource?**

A reliable energy access

B material reuse

C clean water lack

D replaceable use

Understand It with Pulse | Flag a mistake

25 **In energy and environment issues, what does energy security mean?**

A reliable access to affordable energy supplies

B reusing materials instead of throwing them away

C lack of enough clean water to meet needs

D decline in the variety of living species

Understand It with Pulse | Flag a mistake

ANSWER KEY

1. B
2. B
3. C
4. D
5. A
6. B
7. C
8. D
9. A
10. B
11. C
12. D
13. A
14. B
15. C
16. D
17. A
18. B
19. C
20. D
21. A
22. B
23. C
24. D
25. A
