YUKON GEOLOGY 12 (MGEOL12) · UNIT D · 10 QUESTIONS

Geologic Time, Fossils and Planetary Geology — Practice Test

This practice test was made by AI and there may be mistakes. If a question or answer looks wrong, use the Flag a mistake button to let Brett know so he can fix it.

1 **Amber can preserve small organisms in detail because tree resin hardens around the organism and**

- A protects it from decay
- B melts it
- C dissolves its shell
- D crushes it flat

Understand It with Pulse | Flag a mistake

2 **Petrified wood forms when minerals replace the original wood material**

A by freezing

B cell by cell over time

C in a single day

D by melting

Understand It with Pulse | Flag a mistake

3 **The Precambrian covers most of Earth history and includes the time before abundant**

A flowering plants

B humans

C hard shelled fossils

D dinosaurs

Understand It with Pulse | Flag a mistake

4 **During the Mesozoic, the dominant large land animals were the**

- A trilobites
- B first fish
- C early mammals only
- D dinosaurs

Understand It with Pulse | Flag a mistake

5 **Mammals became dominant on land mainly during the**

- A Cenozoic
- B Paleozoic
- C Precambrian
- D Archean

Understand It with Pulse | Flag a mistake

6 **Plate movements over millions of years change Earth surface by building mountains and opening and closing**

- A soil layers
- B ocean basins
- C ice caps only
- D river deltas only

Understand It with Pulse | Flag a mistake

7 **Earth climate has changed through geologic time, including long warm periods and**

- A no oceans
- B no atmosphere
- C ice ages
- D constant temperatures

Understand It with Pulse | Flag a mistake

8 **The Moon surface is covered with craters and fine dust called**

- A magma
- B soil with plants
- C sea ice
- D regolith

Understand It with Pulse | Flag a mistake

9 **Io, a moon of Jupiter, is volcanically active because of heating from**

- A tidal flexing by Jupiter gravity
- B sunlight alone, warming the surface through the long day
- C ocean tides
- D wind

Understand It with Pulse | Flag a mistake

10 **Planetary geology compares planets and moons to understand how surfaces are shaped by**

A ocean currents only

B impacts, volcanism, tectonics and erosion

C weather forecasts only

D human activity

Understand It with Pulse | Flag a mistake

ANSWER KEY

1. A
2. B
3. C
4. D
5. A
6. B
7. C
8. D
9. A
10. B
